

**2020 LIM Vision COW HERD Project (LVCHP)
–NALF/Neogen Research Project Agreement**

Return this signed form with samples to NALF

- I understand this is a research project and a definitive date is not known for results to be incorporated into the EPDs/Herdbook Services.
 - I certify that these samples have been collected and are included on at least 90% of the mature cows that are of calving age within my herd. I understand yearling/replacement heifers may also be submitted even though they are not listed on an inventory yet.
 - I verify that all samples enclosed are from females who are registered/reported into the NALF database.
 - I acknowledge that each of these samples has been properly collected according to the enclosed instructions, stored in a cool/dry place and the appropriate animal is identified on each sample card or linked to a specific Tissue Sampling Unit (TSU).
 - I assume responsibility for all billing associated with these sample submissions and understand a check or credit card payment will be made prior to testing.
 - I understand a submission of an electronic inventory list with barcodes included is required. I also understand cow weights & body condition scores are an optional part of participating and can either be entered into the NALF Herdbook or they need to be entered on a spreadsheet and emailed to NALF.
 - I understand parent verification is included on each sample if the parent(s) have DNA parentage markers on file with NALF.
 - I understand that additional trait testing such as coat color, horned/polled or defects is available on these samples at regular retail price as long as it's requested at the time of submission.
- Furthermore, I acknowledge I'm relinquishing these samples for this NALF genotyping project and understand they will not be available to forward to other laboratories for future testing purposes.
- I agree to ship the samples to the NORTH AMERICAN LIMOUSIN FOUNDATION, ATTN: LVCHP, 6205 S Main St. Suite D-280, Aurora, CO 80016 via FedEx, UPS or USPSpriority mail to supply a tracking number if needed on the shipment.
